

## HOMWORK PROJECT

This homework must be submitted to your Computing teacher by \_\_\_\_\_.

### cloud computing

During this term you will need to complete a project on Cloud Computing. You may present your project in any way you wish as long as it clearly shows an acceptable amount of work for a whole term.

Some examples of how you could present your report are:

- ☆ Video
- ☆ Written report (typed or handwritten)
- ☆ PowerPoint
- ☆ Blog
- ☆ Prezi

Your project **MUST** be written in your own words and demonstrate the use of PEE (Point, Explanation and Example) throughout.

As a minimum your project must explain the following:

- ☆ What is Cloud Computing?
- ☆ Who owns the information stored in "The Cloud"?
- ☆ Is information stored in "The Cloud" secure?
- ☆ How does storing information in "The Cloud" affect data protection laws?
- ☆ Examples of Cloud storage companies.

It would also be good to include positive and negative points about Cloud storage. You could even find examples of news stories to back up your opinions.
